

## Lake Road Widening Fact Sheet

### Project Overview:

Lake Road widening is a project to be constructed during Summer through Fall 2020 and consists of widening the street to accommodate existing travel lanes and add two 5' bike lanes. Most of the widening will be 4-feet, but up to 10-feet in some locations. Traffic signal upgrades at the intersection of SE 34<sup>th</sup> Avenue/Oatfield and Lake Road will be included as part of this project. Approximately 20 utility poles will be relocated out of the new curb line on the North side of Lake Road. Sidewalks will be replaced only where roadway widening requires this to occur. The road reconstruction will consist of a porous pavement overlay to treat stormwater and reduce road noise and spray, the first of its kind in the City. All improvement work will be within city-owned right-of-way, although some impacts to private driveways may occur to ensure connecting grade transitions are smooth.
